**CARD FROM**  
**American Watch Co.,**  
 Waltham, Mass.

My card be leave to inform the almighty new Dominion of Canada that we have made arrangements to introduce our Watches to their notice. They will prove that their watches are the best system than others in the commonest operations in 1880. Every one covers four acres of a seat more than a million dollars, and over 700 operatives. They produce a year, and make and in one half of all the watches in

possible for them to do more than by improving home demand and increasing exports. They must turn their attention to the relations between their manufacturers and the rest of the world. It is not so very briefly this: European watches are entirely by hand. In them, all the most infatigable organs which ever create the watch are the hand and silicone natural processes, the most delicate and the most indispensable to correct time, are in the hands of the watchmaker, the eye and the hand of the creator must vary. But it is a fact that the watches of the higher grades, the most beautiful, the most accurate, are the product of the chagrin, the sweat, and the result is the same. The watchmaker's art is not more in attempted to reproduce the original price. Common workmen, by the rough separate watches from various factories, taken together, and takes them to the merchant. It stamps another any brand and it may be done in London, Paris, Geneva or what a man who thinks he has a genius, of Liverpool," (whose only

### Waltham Watches are Made.

Waltham Watches are made by a process—and by no such inconsiderable means—as the operations of the raw materials—the silver, the gold and the precious metal—the completion of the Watch, under one roof, and under one constant direction. But the great feature of these watches, is the fact that they are all made by the perfect and delicate machinery under the aid of human industry more than a hundred parts in a Watch made by a machine reproduces every succeeding part, carrying on assembly. It is to make the perfect watch style, and then to adjust the necessary to reproduce every clock, and it follows that every watch must be like it. If any part of Waltham Watch should be broken, there is only to addressing the number of his watch to find, whether it is bearing, plain not, and by return mail he

Toronto, Nov. 5.—The funeral of Bishop Strachan took place to day, and was of a most imposing character. In accordance with a request of the City Council, all the stores throughout the city were closed at noon, and business was entirely suspended while the funeral was taking place. Nearly every one appeared in mourning, and several of the streets along the route were

rights and properties of the Dominion; for the adoption of a well considered scheme of Militia organization and defence; for the proper administration of Indian affairs; for the introduction of uniform laws respecting the purchase of lands, the discovery, the naturalization of aliens; and the annihilation of the criminal law, and the laws relating to bankruptcy and insolvency.

A measure will also be submitted to you for the performance of the duty imposed upon Canada, under the terms of the Union Act, of immediate construction of the Intercolonial Railway.

This great work will add a practical and physical connection to the legislative bond which unites the two Provinces comprising the Dominion, and the liability which binds the guarantee for the security of its constitution was given by the Imperial Parliament is a new proof of the hearty interest felt by the British people in your prosperity. Your interests will be considered in the most attentive manner, and subject of western territorial extension, and your attention will be called to the best means for the protection and development of our fisheries and marine increase.

It is the duty of the House of Commons to define the privileges of Parliament, and for the establishment of uniform laws relating to elections and the trial of controverted elections.

*Gentlemen of the House of Commons:—*

The circumstances under which the Act of Union came into operation rendered it impossible to obtain the assent of the Legislature to the expenditure necessary for carrying on the ordinary business of the Government. The expenditure since that day has, therefore, been incurred on the responsibility of the Executive Government, the details of that expenditure will be laid before you and submitted for your sanction. I have directed that the estimates for the current and succeeding financial year shall be presented before you. You will find that they have been framed with all the attention to economy which is compatible with the maintenance of the public service. I am, Gentlemen, your obedient servant.

*John, Gentleman of the House of Commons.*

The national organization and efficiency of the volunteer militia have been greatly improved within the last year, and the whole volunteer force of Ontario and Quebec is already, by the liberality of the Imperial Government, armed with the most modern and best quality of non-leading rifles. I am happy to be enabled to congratulate you on the abundant harvest with which it has pleased Providence to bless the efforts of the volunteers in the prosperity of the Dominion. Our nationality enters on its course, backed by the moral support, the material aid, and the most ardent good wishes of the British people. Our arms are borne bravely, our security, and prosperity prevail, and I fervently pray that your aspirations may be directed to such high and patriotic ends.

**THE MONTHLY.**—The December number of this splendid Magazine of the Sublimities of the Sea, is now out, and is undoubtedly the most valuable publication of the kind in the world. It is a beautiful volume, and contains a number of the most valuable and interesting pictures and designs, calculated to engage the leisure time of lady readers for the current month.

## COMMERCIAL.

The dry weather which has prevailed (with only occasional broken intervals) since June, will continue to be a source of trouble to the farmers. The dryness of the roads has been favorable for the farmers to reach market, but the supply of grain has been so small, that the price of grain has been very low. There is yet a short time for the season, and buyers are prepared to pay good prices.

Wheat—Very small receipts. Fall, \$1.10 to \$1.30. Spring, \$1.20 to \$1.40.

Rye is quoted at \$1.00 to \$1.10. Barley—Quick sale at \$1.00. It is desirable to get this grain in before navigation closes, as the demand will be very large.

Flour—The price of flour is very low. It is estimated that the price of flour will be about \$1.00 per bushel.

Market Report.  
Wheat \$1.20 to \$1.40. Rye \$1.00 to \$1.10. Barley \$1.00 to \$1.10. Flour \$1.00 to \$1.10.

AMERICAN ABSENTEEISM.

At the age of 30, one of the loudest and bitterest complaints uttered by impoverished Ireland, was that so many of her landed proprietors spent the revenue of their estates abroad, instead of re-distributing it in fertilizing streams to revive and foster the energies of their own hard pressed countrymen.

Strange to say, in this new land of the future, so young in growth and so rich in undeveloped resources, men begin to feel the convenience of a similar re-distribution of an certain class of minor capitalists and property owners to other countries.

The attention of the English journals has been called to the fact that in very many of the German and Italian cities, a number of

are so numerously becoming residents, that even to over-ride and elbow out the gentler Britons who once formed the foreign stock of all the Span, University towns, and the small capitals of the Continent. During the last two or three years this settlement of the Spaniards in Europe has become very considerable indeed, and it augments their power week by week. When the new comers are themselves questioned as to the reasons for their large exodus from the Trans-Atlantic to the Atlantic here, they allege the inordinate expense of refined life, as the *primum mobile* of their withdrawal.

Here is another disastrous consequence of incessant agitation and political juggling for the sake of a fictitious statement to study.

**THE TIMBER TRADE**—The latest news from Europe indicate that there is a large supply of timber at much more than adequate prices. The Liverpool as well as the Quebec market is glutted, and timber is available at a remunerative rate. The evil year for the lumber trade is over, and the branch of industry is in a position of considerable tendency to over-produce. A good prosperous year is almost certain to be followed by several years of glutted markets. It is known, however, and so it is, that the world has been taken to Quebec, than every farmer was able to enter the business rushing into the woods and the consequent operations for the lumber trade. The consequence is that the timber trade is glutted, and that neither the new nor the old lumber manufacturer can obtain remunerative prices. It is to be hoped that in the near future the community will keep the price, if not the quantity, of lumber low; and those who are lumbermen of the future will have sufficient common sense to combine for the regulation of the quantity to be taken out, so that the timber trade
